

SEFFA Innovation Fund

The fund will support promising businesses that benefit small holder farmers in the dairy and horticulture value chain.

Why support renewable energy in agriculture?

© M. Wright/Ashden

Increasing productivity and value-addition can be one of the most relevant means to improve smallholder farmers livelihoods and increase their resilience to climate change impacts. Meanwhile using renewable energy technologies contribute to emissions reduction. With support from IKEA Foundation, EnDev's SEFFA Innovation Fund with a budget of EUR 8 million will promote productive use of renewable energy projects in Ethiopia, Kenya and Uganda with a special focus on women and youth.

Fund Summary

Countries

Uganda (open for Applications from January 2022) | Kenya (March 2022) | Ethiopia (May 2022)

Technologies

Solar irrigation, solar cooling and solar drying

Key data

Pilot implementation of 12 months, Grants of EUR 22.500 per applicant, Technical support from GIZ and SNV

For more information about the SEFFA and the Innovation Fund click [→ here](#).

EnDev is a strategic partnership of likeminded donors and partners to support access to modern energy and works in more than 20 countries around the globe. Learn more at [→ endev.info](#). Implementation of SEFFA will be jointly handled by GIZ, SNV and RVO.

The IKEA Foundation is an independent philanthropy focused on creating brighter lives on a livable planet through its grant giving efforts. Learn more at [→ www.ikeafoundation.org](#).
